Mr. Robert L. Morby, Chief  
United States Environmental Protection Agency  
Hazardous Materials Branch  
324 East Eleventh Street  
Kansas City, MO 64106

Dear Mr. Morby:

In searching our records concerning wastes received from Northeastern Pharmaceutical and Chemical Company Inc. (NEPACCO) we find that three loads of chlorinated hydrocarbon, in bulk were received at this plant in 1970. The loads were received the weeks ending 10/06/70, 10/13/70 and on 12/09/70. The total volume received was 12,609 gallons.

This plant was in final stages of construction at that time and since the material was in bulk, it would have been placed in our tank farm for incineration.

I have enclosed copies of reports showing the three loads received.

We do request that the items showing receipts of material from companies other than NEPACCO be held confidential.

Very truly yours,

R.L. Jones  
Vice President
